

Integrated Headset

Instruction Manual

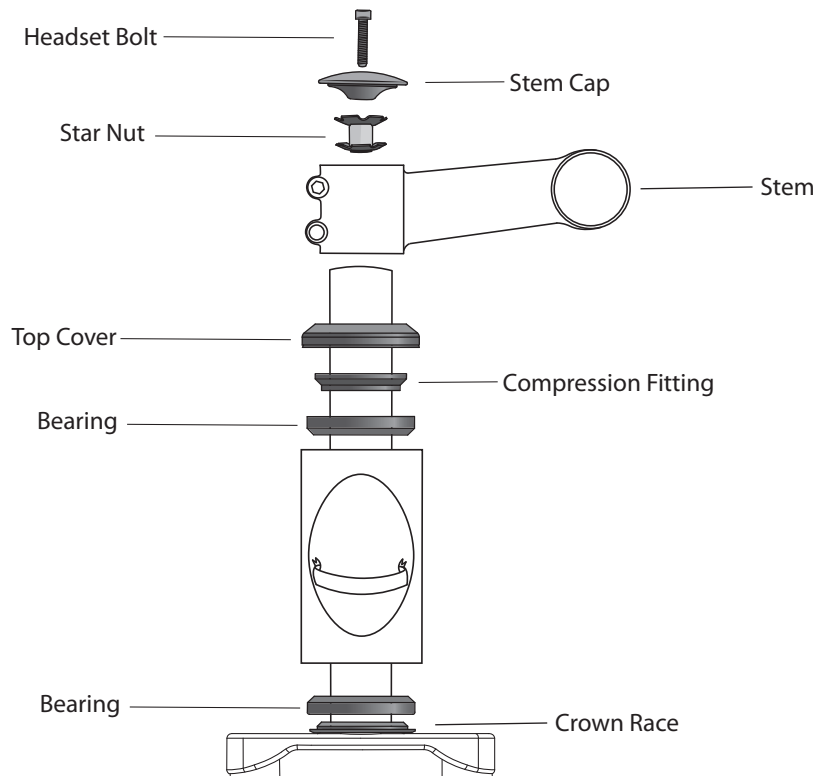

HS011

Please read all instructions before installing your new headset.

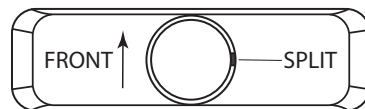

Warning

Failure to install headsets properly may result in damage to your bicycle, serious injury, and/or death.

Note: Installation requires specialized equipment to press fittings onto the steerer tube and into the head tube.

Note: This headset utilizes a split crown race and compression fitting - When installing, be sure that the split is NOT aligned to the centerline of the fork.

Installation

1. Install crown race to fork using an appropriate press. Fitment should be flush and evenly seated.
2. Install upper and lower bearings to the head tube.
3. Using a nut setter, install the star nut into the steerer tube.
4. Place upper bearing, compression fitting and top cover onto steerer tube as shown.
5. Place stem onto steerer tube using appropriate spacers (Not included) to set height.
6. Install stem cap followed by the headset bolt.
7. Check that all fittings are flush with their respective mounting surfaces and that rotation is smooth.
